

## The Female Reproductive System Notes – Pgs. 112 - 115

For females, when does puberty begin?

List Secondary Sex Characteristics:

What are the Female Sex Hormones?

Where are these hormones produced?

What are Follicles?

What is Menopause?

What path does the egg take after it is released?

What is different about egg production compared to sperm production?

What are the stages of the Menstrual Cycle?

When can the egg be fertilized, and then what happens?

Label the Following diagrams:
